

Dezol SAE 50 Engine Oil

Dyna-Plex 21C® Dezol SAE 50 Engine Oil provides optimum protection against deposits while controlling high temperature varnish. Its superior additive chemistry provides a reduction in wear that often occurs during start-up in cold temperatures.

Dyna-Plex 21C Dezol SAE 50 Engine Oil contains anti-wear additives, which provides outstanding protection against scuffing of highly loaded cams, hydraulic lifters and other valve train components, resulting in reduced engine wear. In addition, oxidation inhibitors provide “oil thickening” resistance and rust inhibitors protect against rusting and corrosion of valve lifters, bearings, cylinder walls and other critical engine parts.

<u>PROPERTY</u>	<u>SAE</u>
Gravity, °API	27.5
Lbs./gallon	7.4
Viscosity @ 40°C, cSt	200
Viscosity @ 100°C, cSt	18.5
Viscosity Index	100
Pour Point, °C	-15
Flash Point, °C	250
Total Base No. (TBN)	8.0
Sulfated Ash	1.0

Meets or exceeds the following tests and requirements:
API Service Classification CF, CF-2 and SJ
